

Depression and Suicide Prevention

The truth behind one of the world's least spoken about issues.

An interactive presentation debunking common myths about depression and suicide, hosted by the **Mayor's Youth Leadership Council**.

Did you know?

- Suicide is the second leading cause of death for ages 10-24.
- More teenagers die from suicide than from cancer, heart disease, AIDS, birth defects, pneumonia, influenza, and chronic lung disease combined.
- In the US, everyday there are an average of 5,400 suicide attempts by people between the ages of 12 and 18.
- Four out of five teens who attempt suicide have given clear warning signs.

Information based on data collected by The Youth Risk Behavioral Surveillance System, conducted by the Center of Disease Control and Prevention
