About Community Solutions at the University of South Florida

Nationally recognized for our far reaching efforts to improve and integrate services in the juvenile justice, mental health, education and child welfare systems, we believe that each family and every child has the right to effective services and supports that meet their individual needs and are sensitive to developmental, social, cultural and familial issues.

Our work is reflected in policies and practices in Florida and across the nation, and our collaborative efforts in research, evaluation, technical assistance and training span across many fields and areas of need.

Our website profiles the services and training available to equip individuals, communities and states with the knowledge and skills needed to effectively provide behavioral health services and supports to all children, youth and their families.

Community Solutions Presents Free Professional Development Webinar Series

The webinars presented by Kirsten Ellingsen, PhD listed below, will provide information to early childhood caregivers and program staff about how to help parents address challenging behaviors of young children and identify discipline strategies that promote positive social development and emotional well-being. The webinars will focus on practical, research supported, strategies for preventing problems and effectively addressing challenging behaviors and provide participants information and resources to share with parents.

Part 1: Building a Strong Foundation: Positive Parent-Child Relationships as Prevention

September 26, 2013, 2:00 PM EST

Part 2: Promoting Positive Behavior and Reducing Problems

October 10, 2013, 2:00 PM EST

Part 3: Addressing Problems and Effectively Managing Challenging Behaviors

November 7, 2013, 2:00 PM EST
